

IMPERVIOUS SURFACE CALCULATION WORKSHEET

An impervious surface is defined as an artificial or natural surface through which water, air or roots cannot penetrate. Landscape and decorative rock is not considered an impervious surface. Stepping stones are impervious. A deck is not an impervious surface, provided there is no concrete, plastic or other impervious material underneath the deck. All permanent pools are impervious.

*Any increase in impervious area over 30% must be mitigated by removal elsewhere or by installing a stormwater infiltration feature - see Stormwater Infiltration System Submittal Requirements handout.

Property Owner: _____

Site Address: _____

| |
|-------------------|
| Lot Width (feet): |
| Lot Depth (feet): |

Information on lot size can be found in your property records or on the Ramsey County GIS website: www.ramseycounty.us/residents/property/maps-surveys/interactive-map-gis

| Please use sq. ft. | Existing | Proposed | Change |
