

2019 MILL & OVERLAY PROJECT

TO: Residents in Project Area 19-13
(Stewart Avenue, Chicago Avenue and Morehead Avenue)

FROM: Jayson Stejskal, Engineering Technician III

DATE: May 31, 2019

SUBJECT: Paving
City Project No.: 19-13

Weather permitting, T.A. Schifsky & Sons will begin paving the final lift of bituminous pavement on the alley and the bituminous driveway aprons on **Monday, June 3rd**.

You can park on Stewart Avenue, Chicago Avenue and Morehead Avenue. Please park your vehicles on **only one side** of the street. We apologize for any inconvenience.

You will not be able to drive on the paved portion of the road for at least two hours or until they have finished rolling the newly paved roads. WE ASK THAT YOU TAKE EXTREME CARE NOT TO MAKE SHARP TURNS ON THE NEW BITUMINOUS PAVEMENT.

- **WARNING**

New asphalt is very hot (**approximately 300°F**) when placed. Parents should keep children and pets from walking or riding bikes on the new pavement until it cools. Please talk to your children and explain about the paving and that they should stay a safe distance from the construction equipment.

- **SAFETY**

Due to the heavy traffic and general construction activity, we ask all parents to make their children aware of the dangers of the construction sites. Please keep children a safe distance from all construction areas.

We also ask that you DO NOT PARK on the new bituminous pavement for FIVE DAYS as the tires will leave imprints on new bituminous. Please note, due to the nature of asphalt material, your driveway may become softer in high temperature weather conditions throughout its lifespan. Vehicles, trailers, boats, etc. may cause indentations or marks if left parked on your driveway for extended periods during hot summer months.

If you have any special requests, please contact our office at 651-429-8531 or direct any project-related questions to City staff on site.

Thank you for your cooperation.
