

## City of White Bear Lake

4701 Highway 61 N.  
White Bear Lake, Minnesota 55110  
651-429-8531 | [www.whitebearlake.org](http://www.whitebearlake.org)

**TO:** Eugene Street (west of 4<sup>th</sup> Avenue)  
**FROM:** Dan Holzemer, Senior Engineering Technician  
**DATE:** May 24, 2022  
**SUBJECT:** Bituminous Driveway Ends  
City Project No. 22-01

---

Weather pending, the **bituminous driveway ends** will be installed **tomorrow, Wednesday, May 25<sup>th</sup>**. As a courtesy reminder, the contractor will knock on your door to let you know that they will be beginning work on your driveway.

**Please do not park on the new bituminous aprons for at least 48 hours.** The longer it cures, the better it is for the driveway ends. Vehicles can be driven across the new asphalt; however, we recommend that you do not park on the new bituminous driveways and aprons for at least \*5 days as the tires will leave imprints on new bituminous. We also ask that you take extreme care not to make sharp turns on the new bituminous.

*\* Please note, due to the nature of asphalt material, your driveway may become softer in high temperature weather conditions throughout its lifespan. Vehicles, trailers, boats, etc. may cause indentations or marks if left parked on your driveway for extended periods during hot summer months.*

**WARNING:**

New asphalt is very hot (**approximately 300°F**) when placed. Parents should keep children and pets from walking or riding bikes on the new pavement until it cools. Please talk to your children and explain about the paving and that they should stay a safe distance from the construction equipment.

If you have any questions now or throughout the project or have special needs, please call the City's Engineering Department at 651-429-8531 or email our office at [cvermeersch@whitebearlake.org](mailto:cvermeersch@whitebearlake.org).

Thank you for your cooperation.
