

2021 PAVEMENT REHABILITATION PROJECT

TO: Residents on Birch Lake Avenue

FROM: Dan Holzemer, Senior Engineering Technician

DATE: June 15, 2021

SUBJECT: Milling
City Project No.: 21-06

On **Wednesday, June 16th**, the Contractor will be milling (grinding) the upper layer of bituminous pavement. The street surface will be rough, but is safe to drive on. Vibration from compactors will translate to shaky walls. Please make sure hanging items are secure or removed from the wall.

This work will be ongoing throughout the day. As will be the case during the entire construction season, work schedules are dependent upon weather.

In order to complete the construction project in the most efficient manner, it is important that the Contractor have as few obstructions as possible. **Please do not park vehicles on Birch Lake Avenue** during working hours (7AM to 9PM or until work ceases for the day). If a vehicle and/or trailer is on the street in the construction zone during working hours and is impeding the construction, the Engineering Department will take further action and tow the obstruction.

Please contact our office at 651-429-8531 with any questions.

Thank you for your patience and understanding.
