MINNESOTA

2020 STREET RECONSTRUCTION PROJECT

TO: Residents on Bellaire Avenue

FROM: Dan Holzemer, Senior Engineering Technician

DATE: April 24, 2020

SUBJECT: **Construction Begins**
City Project No.: 20-06

You may have noticed that construction is about to begin on the City's 2020 Street Reconstruction Project.

Many property owners have installed irrigations systems, invisible fencing, sump pump drains, and other landscape items (flower beds, rock gardens, shrubs, etc.) adjacent to the street. Because these private irrigation systems, fence systems and landscape items are within the City street right-of-way, they are potentially in the path of the reconstruction project and should be moved.

Property owners are responsible for temporarily moving or relocating their own systems. This work should be taken care of before crews start working on your street. Crews are scheduled to start on your street as early as **Monday, April 27th**. The Engineering Department suggests that you remove sprinkler heads and plug lines that are located within 15 feet of the existing street as well as pull the pipe ends up or mark them in some way so they can be easily seen. **You** will still be **responsible** for repairing any irrigation or fencing you have placed within the right-of-way, but these suggestions will minimize costs for replacing the systems later on.

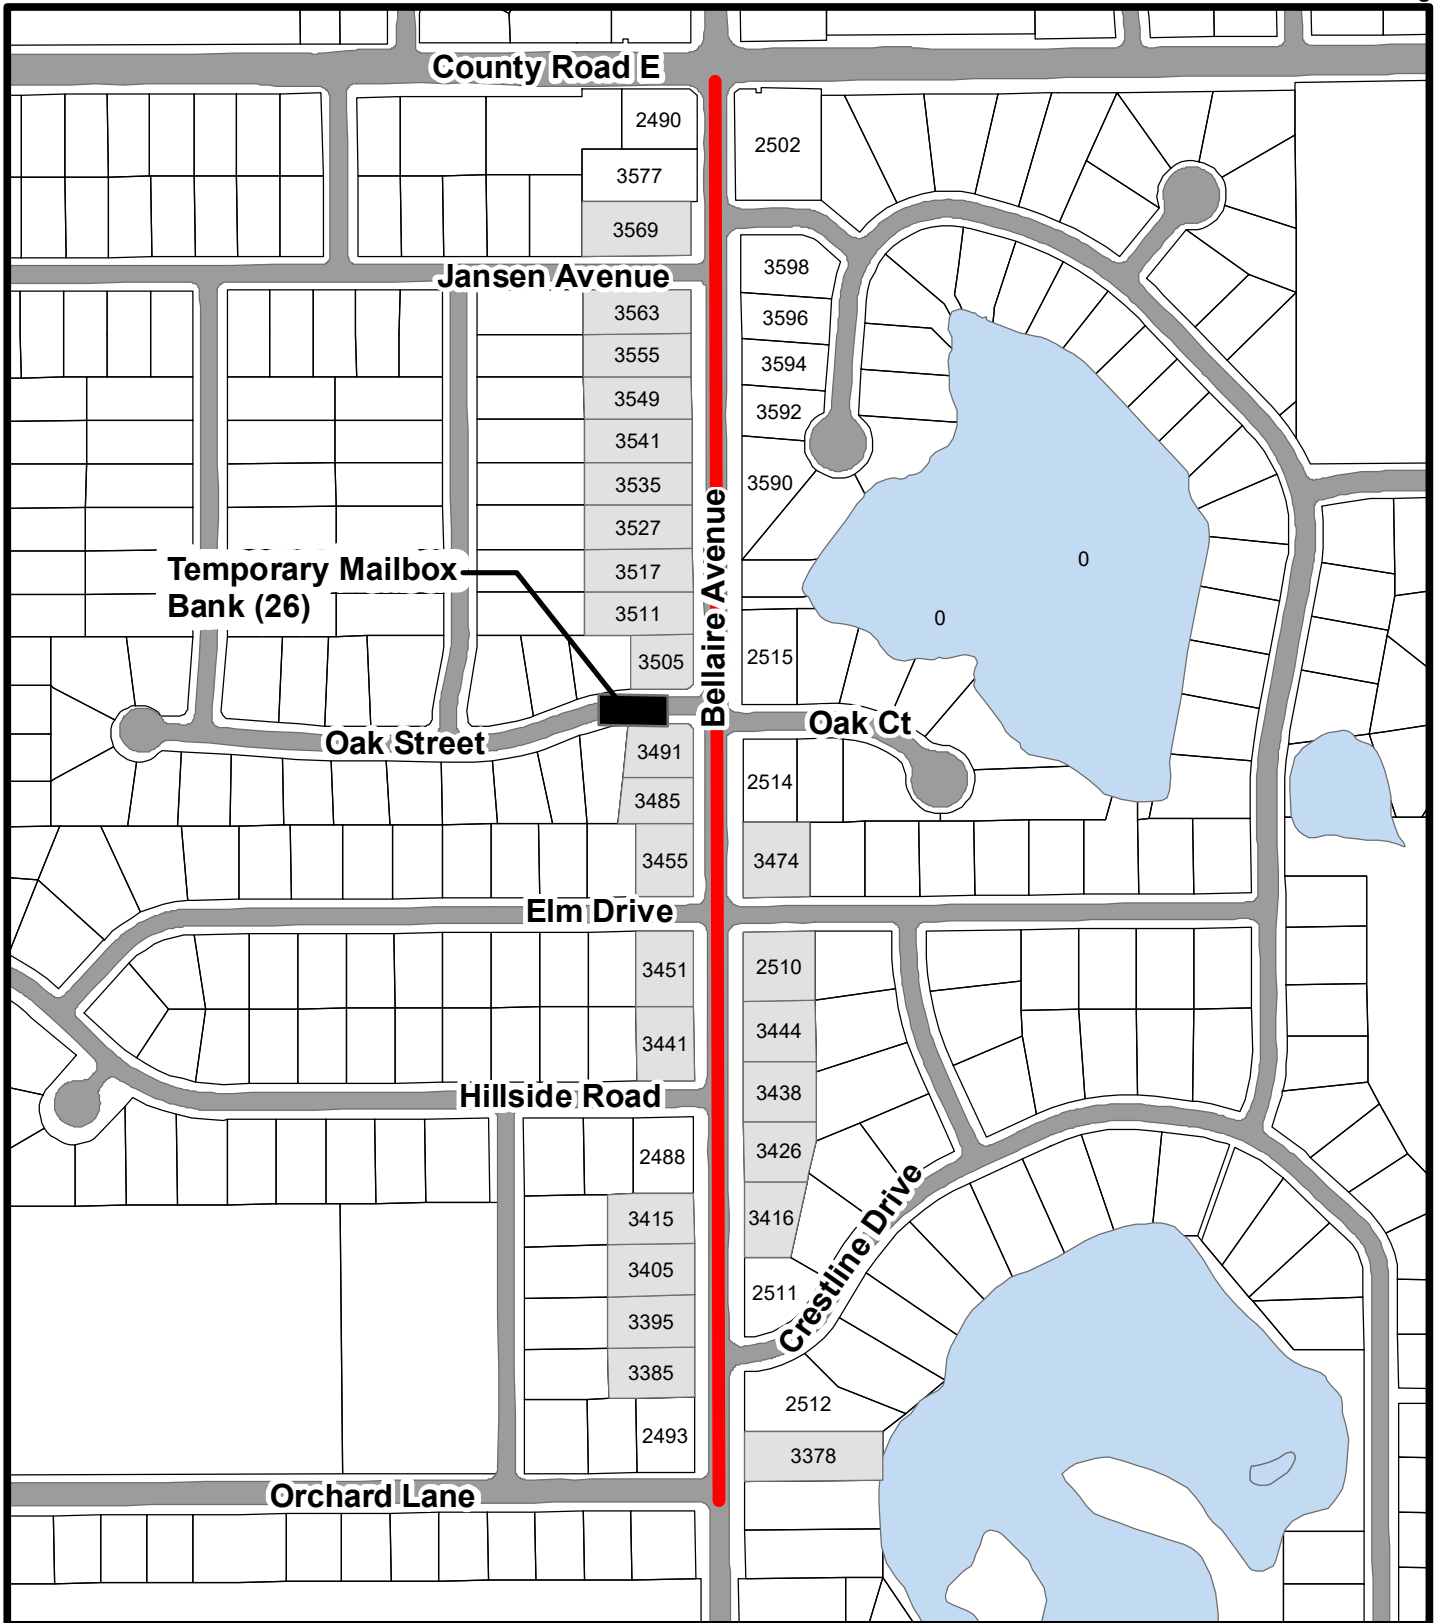

Temporary mailboxes have been installed in a location that was determined by the Post Office. A map identifying the mailbox location is attached to this letter. A separate temporary mailbox is provided for each homeowner with the address clearly labeled. If you are concerned about the security of your mail, you may contact the Post Office.

Your letter carrier will make the determination as to when to switch delivery to the temporary mailboxes. Please check **both** your permanent mailbox and temporary mailbox to ensure you receive your mail. Once delivery has changed to the temporary location, the contractor will remove your permanent mailbox and place it in your yard, outside of the construction limits. Please store your mailbox in your garage, shed, or back yard until they are ready to be reinstalled near the end of the project. If you are unable to find your address on the temporary mailboxes, please call us and we will help you locate it.

If you have any questions, please discuss these with an Engineering Technician on site, or call our office at 651-429-8531.

Thanks for your cooperation!
