MINNESOTA

2018 STREET RECONSTRUCTION PROJECT

TO: Residents in Project Areas 17-06, 18-01 and 18-06

FROM: Jesse Farrell

DATE: May 2, 2018

SUBJECT: Pre Construction Update
City Project Nos.: 17-06, 18-01 and 18-06

Depending on what part of the City you reside, you may have noticed that construction has commenced on the City's 2018 Street Reconstruction project.

The utility companies and our contractor is off to a great start. Starting next Friday, May 11th, we will be sending you a bi-weekly construction newsletter.

Significant activities are occurring in the areas of 10th St, 11th St, Morehead Avenue (north of 11th St) and the alleys north of 10th St. This area will experience significant disruption over the next 2 months, but should be nearly complete by the 4th of July. A similar aggressive and disruptive construction process will be occurring on Old White Bear Avenue.

The remainder of the project areas will be at a more measured pace. Not nearly as disruptive, with significant construction not complete until sometime in October.

All timelines are subject to change due to weather conditions.

Special note to Morehead residents – the Morehead public right of way “green space” (south of 11th St) is being used as a temporary construction staging area. This allows the Contractor to efficiently complete the project (saving time and money). Following construction, this area will be restored as a green space.

Please keep our office posted with your questions and concerns!
