

WHITE BEAR LAKE *a City of Lakes & Legends*
MINNESOTA

2020 MILL & OVERLAY PROJECT

TO: Residents on 5th Street, Dillon Avenue and Woodcrest Road

FROM: Dan Holzemer, Senior Engineering Technician

DATE: July 22, 2020

**SUBJECT: Milling Pavement Begins
City Project No. 20-13**

One of the steps in the construction process is to mill (or grind) off the top asphalt surface of the street. This work is expected to take place on **Thursday, July 23rd**. As will be the case during the entire construction season, work schedules are dependent upon weather. Watch future construction updates for further information.

In order to complete the construction project in the most efficient manner, it is important that the Contractor have as few obstructions as possible. As a friendly reminder, please **DO NOT park your vehicles, trailers and boat trailers on the streets under construction during working hours (7AM to 7PM, or until work ceases for the day)**. If a vehicle and/or trailer is on the street in the construction zone during working hours and is impeding the construction, the Engineering Department will take further action and tow the obstruction. You will generally have access most of the day. If the removal is taking place directly in front of your driveway, you may not have access to your driveway for about fifteen minutes.

Please contact our office at 651-429-8531 with any questions.

Thank you for your patience and understanding.
