

WHITE BEAR LAKE *a City of Lakes & Legends*

MINNESOTA

2021 PAVEMENT REHABILITATION PROJECT

TO: Residents on Savannah Avenue

FROM: Dan Holzemer, Senior Engineering Technician

DATE: May 28, 2021

SUBJECT: Bituminous Apron Installation
City Project No.: 21-13

The **bituminous aprons** will be installed **TODAY, Friday, May 28th**. As a courtesy reminder, the contractor will knock on your door to let you know that they will be beginning work on your driveway.

Please do not park on the new bituminous aprons for at least 48 hours. The longer it cures, the better it is for the aprons and driveways. Vehicles can be driven across the new asphalt; however, we recommend that you do not park on the new bituminous driveways and aprons for at least *5 days as the tires will leave imprints on new bituminous. We also ask that you take extreme care not to make sharp turns on the new bituminous.

** Please note, due to the nature of asphalt material, your driveway may become softer in high temperature weather conditions throughout its lifespan. Vehicles, trailers, boats, etc. may cause indentations or marks if left parked on your driveway for extended periods during hot summer months.*

WARNING:

New asphalt is very hot (**approximately 300°F**) when placed. Parents should keep children and pets from walking or riding bikes on the new pavement until it cools. Please talk to your children and explain about the paving and that they should stay a safe distance from the construction equipment.

If you have any questions now or throughout the project or have special needs, please call the City's Engineering Department at 651-429-8531 or email our office at cvermeersch@whitebearlake.org.

Thank you for your cooperation.
